ANNUAL REPORT OF THE PUBLIC SERVICE COMMISSION OF SOUTH CAROLINA

To the General Assembly of South Carolina:

The Public Service Commission has the honor to respectfully submit for your consideration this its 120th Annual Report.

Below is the listing of the present Commissioners and the Counties comprising their districts:

First District

William "Bill" Saunders,.....Johns Island, S.C.
Beaufort, a portion of Berkeley, Charleston, Colleton, Dorchester, Hampton, Jasper

Second District

C. Dukes Scott,.....Columbia, S.C.
Bamberg, Calhoun, Lexington, Orangeburg, Richland

Third District

Guy Butler, Chairman,.....Greenwood, S.C.
Abbeville, Aiken, Allendale, Anderson, Barnwell, Edgefield, Greenwood, McCormick,
Oconee, Pickens, Saluda

Fourth District

Philip T. Bradley, Vice Chairman,.....Greenville, S.C.
Greenville, Spartanburg, Union

Fifth District

Cecil A. Bowers,.....Camden, S.C.
Cherokee, Chester, Chesterfield, Fairfield, Kershaw, Lancaster, Laurens, Lee, Newberry,
Sumter, York

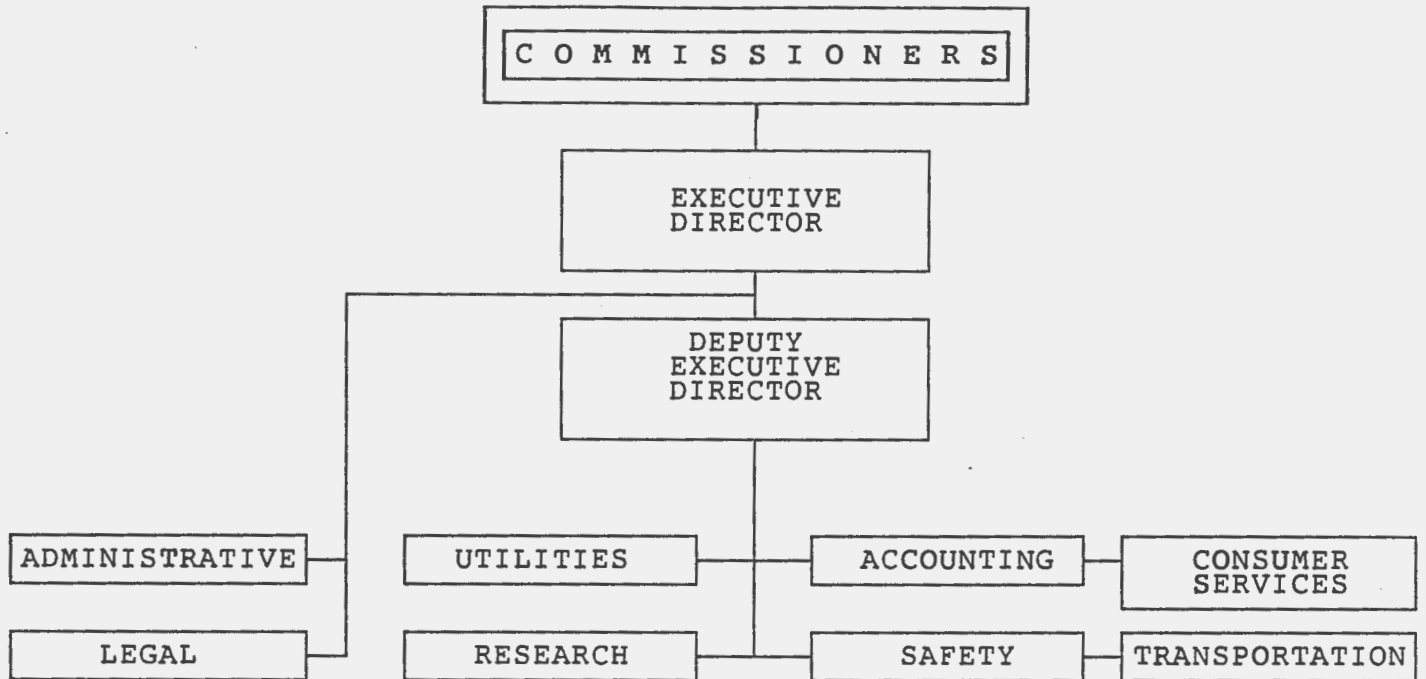

Sixth District

Warren D. Arthur, IV,.....Hartsville, S.C.
A portion of Berkeley, Clarendon, Darlington, Dillon, Florence, Georgetown, Horry,
Marion, Marlboro, Williamsburg

At Large

Rudolph Mitchell, Chairman,.....Saluda, S.C.
Statewide

PUBLIC SERVICE COMMISSION OF SOUTH CAROLINA

Commissioners

Guy Butler	803-737-5260
Philip T. Bradley	803-737-5220
Rudolph Mitchell	803-737-5250
Cecil A. Bowers	803-737-5190
Warren D. Arthur, IV	803-737-5210
William "Bill" Saunders	803-737-5200
C. Dukes Scott	803-737-7250

Administrative Department

Charles W. Ballentine, Executive Director	830-737-5120
Gary E. Walsh, Deputy Executive Director	803-737-5133

Accounting Department 803-737-5165

Legal Department 803-737-5113

Consumer Services Department 803-737-5230

Research Department 803-737-5122

Safety Department 803-737-5193

Transportation Department 803-737-5191

Utilities Department 803-737-5125

KEY COMMISSION PERSONNEL

Listed below are the names and titles of the responsible Commission Staff members and key personnel:

Charles W. Ballentine.....Executive Director
Gary E. Walsh.....Deputy Executive Director
E. Bruce Hulion.....Controller
Carolyn C. Nelson.....Director, Personnel
F. David Butler.....General Counsel
William P. Blume.....Manager, Accounting Department
April B. Sharpe.....Manager, Consumer Services Department
D. Wayne Burdett.....Manager, Utilities Department
R. Glenn Rhyne.....Manager, Research Department
James S. Stites.....Manager, Safety Department
George Parker.....Manager, Transportation Department

STATUTORY AUTHORITY OF
THE PUBLIC SERVICE COMMISSION OF SOUTH CAROLINA

Utility regulation in South Carolina had its beginning with the passage of an Act by the 1878 General Assembly, creating a Railroad Commission for the purpose of regulating railroads operating within the State. The first Commissioner was appointed December 24, 1878, by the then Governor Wade Hampton.

The General Assembly in 1910 established a Public Service Commission, empowering it with the authority to "fix and establish in all cities of the State rates and charges for the supply of water, gas or electricity furnished by any person, firm or corporation to such cities, the inhabitants thereof, and to prescribe penalties."

The 1922 General Assembly combined the two three-member commissions and added one additional commissioner to form the present seven-member commission. The name was changed in 1934 to the Public Service Commission.

The Commission is elected by the General Assembly for a term of four years, one from each of the six Commission Districts and one Commissioner at-large.

The Commission is composed of the Administrative, Accounting, Consumer Services, Legal, Research, Safety, Transportation, and Utilities Departments.

The Commission, as provided for by the South Carolina Constitution and as vested with power and jurisdiction by the South Carolina General Assembly, performs the following general functions:

1. Regulation and supervision of investor-owned electric utilities as to rates, charges, services, facilities, practices, accounting procedures, the purchase, sale and lease of utility property and the issuance of securities; and the administration of the Territorial Assignment Act relative to territorial boundaries. S.C. Code Ann., Section 58-27-10 et. seq., (1976), as amended; and Reg. 103-300, et. seq. Also the Utility Facility Siting and Environmental Protection Act (1971), S.C. Code Ann., Section 58-33-10, et seq.
2. Regulation and supervision of rates and charges, services, facilities, practices and accounting procedures of all intrastate investor-owned gas, street railway, water and sewerage companies; and the administration of the Gas Safety Act of 1970. S.C. Code Ann., Sections 58-5-10 et. seq. (1976), as amended; Reg. 103-400 et. seq.; Reg. 103-500 et. seq.; Reg. 103-700 et. seq.
3. Regulation and supervision of rates and charges, services, facilities, practices and accounting procedures of all telephone companies within the State. S.C. Code Ann., Section 58-9-10 et. seq., (1976), as amended; Reg. 103-600 et. seq.

4. Regulation and supervision of services and practices of all radio common carriers within the State, except rates and entry, as per Order of the Federal Communications Commission. S.C. Code Ann., Sections 58-11-10 et. seq. (1976), as amended.
5. Regulation and supervision of for hire motor carriers of household goods, hazardous waste for disposal, and passengers relative to rates, schedules, rules, charges and facilities; issuance and supervision of the administration of Certificates of Public Convenience and Necessity, Fit, Willing, and Able, and Charter Bus. S.C. Code Ann., Sections 58-23-10 et. seq., (1976), as amended; Regs. 103-100, 103-200, et. seq.
6. Regulation and supervision of services and facilities of railroads and railways. S.C. Code Ann., Section 58-17-170 et. seq., (1976), as amended; as permitted by Federal Law.

SUMMARY OF ACTIVITIES DURING YEAR 1997-1998

During the past fiscal year, the Transportation Department dispensed license decals to 2,497 operating units varying in price from \$7.50 to \$50.00 each, according vehicle carrying capacity or empty weight. The various license decal fees assessed produced revenues of \$114,980.

As of December 31, 1997, 209 electric, gas, and telephone utilities operating within the State reported a total plant investment of \$15.5 billion and generated gross revenues of \$5.7 billion. The 87 water and sewerage companies operating within the State generated \$21.5 million of gross revenues.

From the tremendous growth of industry in the State in the past several years, coupled with the expanding economy, as evidenced by the above figures, conservative projections indicate that utility installations will more than double within the next ten years. During the past fiscal year, the Commission processed 1,930 complaints; hearings were held thereon when necessary, and over 1,015 Orders were issued overall.

SUMMARY OF EXPENDITURES
EXPENDITURES

I. Administrative.....	2,943,997
II. Utilities.....	618,997
III. Transportation.....	770,713
IV. Employer Contributions.....	<u>726,839</u>
GRAND TOTAL (PUBLIC SERVICE COMMISSION)	5,060,546

The Public Service Commission hereby states that it did not purchase any energy conservation products that had not been certified by the State Energy Office.

I. ADMINISTRATIVE DEPARTMENT

The functions and responsibilities of the Administrative Department are as follows:

1. Maintains formal docket control which includes the receipt of all Petitions, dockets matters that come before the Commission, notifies the public of such request, determines the time required to hear a matter, sets hearings on official calendar and notifies parties of record of hearing dates.
2. Custodian of all official papers and records of the Commission and certifies same.
3. Personnel - supervises and administers the personnel program of the Commission.
4. Budget - supervises the planning and directs preparation of the budget submitted to the Budget and Control Board; supervises financial control of expenditures in accordance with fiscal appropriations.
5. Purchasing - supervises the purchasing of all supplies and equipment, equipment inventory and the maintenance of records for the Commission.
6. E.E.O.C. - acts for the Commission as liaison with the State Human Affairs Commission.
7. Supervises Hearing Reporter of the Commission.

The Administrative Department docketed 603 matters which came before the Commission during the 1997-1998 fiscal year. Numerous filings, such as motions, petitions, and various requests, were posted to these dockets for the Commission's consideration. The hearing reporter transcribed the testimony and received evidence in the hearings held before the Commission, including performing her duties at the night hearings held so that the public may have the opportunity to express their views before the Commission.

II. LEGAL DEPARTMENT

The Office of General Counsel performs the following functions:

- (a) Represents and appears for the people of the State and the Commission in all actions and proceedings involving any question of general and public interest within the jurisdiction of the Commission and, if directed to do so by the Commission, intervenes, if possible, in any action or proceeding in which any such question is involved;
- (b) Commences, prosecutes and expedites the final determination of all actions and proceedings directed or authorized by the Commission;
- (c) Advises the Commission Staff and each Commissioner, when so requested, in regard to all matters connected with powers and duties of the Commission and the members thereof;
- (d) Generally performs all duties and service as attorney to the Commission which the Commission may require of it.

Attorneys in the Office of the General Counsel represented the Commission Staff in 257 hearings and Commission meetings before the Commission during the 1997-1998 fiscal year. These hearings and meetings involved both Utility Department and Transportation Department matters and included issues ranging from billing disputes to major rate increases to applications for certificates of public convenience and necessity. The Office of the General Counsel also participated in informal proceedings along with Commission Staff members and the interested parties for the purpose of resolving complaints or inquiries or for the purpose of gathering information in matters arising under the jurisdiction of the Commission.

During the 1997-1998 fiscal year, the Office of the General Counsel had decisions rendered in appeals before the Circuit Court of South Carolina, the State Supreme Court, and the U.S. District Court. Several cases were pending before the Circuit Court and the Supreme Court.

III. ACCOUNTING DEPARTMENT

The Accounting Department is composed of nine Public Utility Accountants, who all report to the Accounting Manager.

The Accounting Department's primary function is to examine the books and records of Utility Companies which are either requesting a change in rates or being audited for compliance with Commission orders. A rate case examination or a compliance audit implements principles and procedures based upon regulatory laws and in this respect differs from audits conducted by a Company's public accountants. After their examination, the Staff makes adjustments in the company's operations to achieve a "normalized" test year. Staff's exhibits and testimony, if necessary, are directed toward the company's operations and Staff's adjustments. Based on the Staff's audit report and the company's information, the Commissioners are able to determine an equitable rate of return on the company's investment, operating margin or compliance with Commission orders.

The Accounting Staff's audits also insures that proper cutoffs of the test year are implemented as well as substantiating those revenues, expenses, and rate base items are allocated according to proper jurisdiction. Employing the necessary procedures, Staff verifies the utility's operations and verifies the books and records to the filing and its related exhibits.

With any audit, the Staff places emphasis upon policies and procedures and the instructions thereto, as stated in the Chart of Accounts for the various types of regulated companies. The Chart of Accounts outlines which revenues, expenses, and asset accounts will be ultimately used to determine the company's rate of return on investment and operating margins.

After completing their examination, a report will be prepared by the Accounting Staff with all necessary exhibits along with a written explanation of each of the exhibits. Copies of the Accounting Staff's report are distributed to each Commissioner, the Company, any Intervenor, other members of the Staff, and all other parties of record. Members of the Staff may be called to testify before the Commission and submit the Report into evidence during the hearing.

The Accounting Department also reviews the changing prices-attributable to fuel prices. Specifically electric companies utilize a fuel adjustment clause and gas companies use a purchased gas adjustment clause. The Department annually monitors fuel costs, performs audits, prepares reports and participates in formal hearings before the Commission centering on escalating fuel costs. Audits related to refunds from gas suppliers back to South Carolina jurisdictional ratepayers are also conducted.

The Accounting Department administers the Legislative ordered gross receipts tax, which is paid on an annual basis by the utility companies and regulated transportation carriers serving customers in South Carolina. These companies are required to report all their revenues received within the State. Tax assessments are based on these intrastate revenues.

The Accounting Department is also responsible for administration and auditing of the Commission ordered Interim LEC Fund. The Fund was setup by the Commission in order to offset revenue losses that come about due to the lowering of access charges in the State. All local exchange carriers were required by law to lower their access rates to equal or be less than the major local exchange carrier operating in the State. Such major carrier was BellSouth. The Fund is presently expected to be in effect some five years by which time the local exchange carriers are expected to offset these losses through increases in local rates thereby eliminating the need for the Fund.

The Accounting Department has prepared tables showing Operating Revenues, Operating Expenses, Net Operating Income, State and Local Taxes Paid, and Gross Plant in Service for Electric and Gas Utilities for the years 1994-1997. Operating Revenues, Operating Expenses, Net Operating Income, and Gross Plant in Service are shown for Telephone Utilities for the year ending 1997. Operating Revenues, Operating Expenses, and Net Operating Income are shown for Water and Sewerage Utilities for the year 1997. Operating revenues and expenses are shown for transportation companies operating in South Carolina for the year 1997.

The Tables are as follows:

TABLE A - Privately Owned Electric Utilities Operating in South Carolina. Selected Statistics for South Carolina only. For the Years Ended December 31, 1994-1997.

TABLE B - Privately Owned Gas Utilities Operating in South Carolina. Selected Statistics for South Carolina only. For the Years Ended December 31, 1994-1997.

TABLE C - Communications Utilities Operating in South Carolina. Selected Statistics for South Carolina Operations. For the year ended December 31, 1997.

TABLE D - Water and Sewerage Utilities Operating in South Carolina. Selected Statistics for South Carolina for Fiscal and Calendar Year 1997.

TABLE E - Transportation Companies Operating in South Carolina. Selected Statistics for Fiscal and Calendar Year 1997.

CONSUMER SERVICES DEPARTMENT

The Consumer Services Department's primary responsibility is to respond to public contacts to address consumer complaints and inquiries concerning the utility and transportation companies regulated by the Commission. Utility customers can contact the Department by mail or through the Public Service Commission's local or toll-free telephone numbers. Customers can also visit the Public Service Commission's office in Columbia to discuss utility and transportation related concerns. Consumer Services Investigators are available Monday through Friday, from 8:15 a.m. to 4:45 p.m. to respond to the public and investigate billing, service and other utility and transportation related problems.

The Consumer Services Department was created in August 1991. The department's function is to work with the utility and transportation companies and their customers in an informal process to settle disputes and complaints and to advise the Commission and the public on evolving issues which may impact the public interest of the consumers in South Carolina. In addition to the investigation of consumer complaints, the department's investigators testify in complaint hearings and other consumer related hearings before the Commission, enforce the rules and regulations governing the utility and transportation companies regulated by the Commission, and assist in the development of regulatory policies.

Consumer Services provides an analysis of the complaint activity to monitor the utility and transportation companies' compliance with the Commission's rules and regulations governing the services provided to their customers.

V. UTILITIES DEPARTMENT

The function of the Utilities Department of the Public Service Commission is to perform the necessary duties related to the regulation of utilities under the jurisdiction of the Commission. Management plans, coordinates, directs and supervises the work of the four areas as shown below:

- Gas
- Electric
- Telecommunications
- Water and Wastewater

Each area on the following pages of this report summarizes the activities of this Department for the fiscal year 1997-1998, affecting the various utility groups. 544 orders were issued through this Department during the fiscal year, and public hearings were held in connection with 178 of these orders.

A. GAS

There are four private corporate natural gas utilities serving customers in South Carolina. The rates and services of these utilities are subject to jurisdiction of the Public Service Commission. The natural gas utilities and the communities they serve are listed in the tables included in this report.

Natural gas brought into South Carolina is produced principally in the gas fields of Louisiana and Texas, including the offshore areas in the Gulf of Mexico. During the fall of 1978, our State started receiving gas from Algeria. Liquefied natural gas was transported from Algeria to a regasification plant and marine terminal located on Elba Island, which is near Savannah, Georgia. However, this plant operated by Southern Energy Company, presently is not receiving the shipments because the Algerian Government has terminated the contract for the supplies.

Gas is transported to South Carolina by two interstate pipeline companies: Transcontinental Gas Pipeline Company and Southern Natural Gas Company. Transcontinental's pipeline crosses the State in the northwest corner, passing just south of Anderson and Spartanburg, South Carolina, while Southern's pipeline enters and terminates in our State at a point near Aiken. All natural gas consumed in South Carolina is transported to the State by these two interstate pipelines which furnish gas to natural gas authorities, municipalities, and privately owned gas utilities.

The Federal Energy Regulatory Commission (FERC) has jurisdiction over rates and services of interstate pipeline companies and the price of natural gas sold and transported by interstate pipelines. These price fluctuations have a direct bearing on the cost for natural gas to the ultimate consumer in South Carolina.

Many communities in South Carolina are receiving natural gas through facilities owned by municipalities or gas authorities over which the Commission has no rate or service jurisdiction. However, the South Carolina Gas Safety Act of 1970 vested the Commission with pipeline safety jurisdiction over all gas system operators not subject to Federal Energy Regulatory Commission jurisdiction. Therefore, pipeline safety jurisdiction includes public utilities, municipalities, natural gas authorities, certain facilities operated by interstate companies, certain public housing authorities and others who purchase natural gas through a master meter for subsequent distribution to individual consumers, certain liquefied petroleum systems, and methane landfill facilities. As of June 30, 1998, the Commission's pipeline safety jurisdiction included a total of twenty-eight (28) individual operators.

All four private gas utilities are operating under the provisions of curtailment plans designed to allocate gas on the basis of priority of service established by such factors as efficiency of use, safety considerations, consumer reliance, and alternate fuel availability.

Two factors showing the pace of activity by natural gas utilities are the average number of customers and the gross plant investment. The growth in total customers served by each privately owned gas utility is shown by one of the accompanying tables. The total of natural gas customers grew from 302,293 in 1993 to 351,279 in 1997 for an increase of 16.20% over the five years.

Rates were adjusted in accordance with approved purchased gas adjustment clauses that are designed to track changes in rates of interstate pipeline companies. Two companies adjusted rates during the winter period in accordance with a Weather Normalization Adjustment (WNA).

The Commission has issued Orders to all privately owned natural gas utilities, under the Commission's jurisdiction, establishing annual hearings to review the utilities' purchased gas adjustment procedures and gas purchasing policies. During this fiscal year the Commission completed these annual hearings for four (4) privately owned utilities.

Because of various changes in the regulatory policy at the federal level, the gas industry is going through considerable changes. The customers in our State are now permitted to purchase their own gas supplies and rely only on our gas utilities to transport the gas. The gas utilities also are permitted to secure their own system supply gas from sources other than the interstate pipelines.

FERC has issued Orders that have changed the function of interstate pipelines from a supplier to a transporter of gas. Recent Orders issued by FERC are designed to create a competitive, deregulated business in buying and selling gas on the interstate level. The local intrastate distributors will now have several different sources to secure their supplies from and the interstate pipelines will primarily only be used for transportation purposes.

In calendar year 1987 the Federal Energy Regulatory Commission (FERC) issued an order to the interstate pipelines whereby mechanisms were adopted for the recovery of buy-out and buy-down costs. These costs are associated with payments made by the interstate pipelines to producers to extinguish outstanding take-or-pay liability under existing contracts, or to reform the price, volume or the terms of the contracts. In the years following enactment of the Natural Gas Policy Act, interstate pipelines sought to obtain additional supplies, much of which were purchased under contracts incorporating substantial take-or-pay obligations. However at the same time gas prices were being driven up, demand for natural gas began to soften and the interstate pipelines began to incur take-or-pay obligations from the producers. Both interstate pipelines serving our State have begun to collect these charges from the natural gas distributors under the Commission's jurisdiction. The Commission has ruled that the gas distributors may recover the charges from their customers through their approved purchased gas recovery procedures.

B. ELECTRIC

The Utilities Department is responsible for providing the Commission with data and information necessary for the regulation of all privately-owned electric utilities operating in South Carolina. This regulation of the electric utilities is designed to provide adequate service at reasonable rates to the people of South Carolina while assuring that these utilities are provided an opportunity to earn a reasonable rate of return on the fair values of properties devoted to the public service.

AVAILABILITY OF ELECTRIC POWER

Carolina Power & Light Company, Duke Power and South Carolina Electric & Gas Company, the three major utilities serving the State continue planning and building facilities so that adequate electric power will be available for present customers and those who select to locate within the State.

South Carolina customers are receiving power from the Clarks Hill Project, the Hartwell Project, and the Richard B. Russell Project through the transmission lines of the South Carolina Public Service Authority, Duke Power and South Carolina Electric & Gas Company.

The VACAR Group of the Southeastern Electric Reliability Council is a group of electric utilities operating in Virginia, North Carolina and South Carolina and includes Carolina Power & Light Company, Duke Power, South Carolina Electric & Gas Company, South Carolina Public Service Authority, Virginia Power Company, as well as two smaller utilities (Yadkin and SEPA). This Council was formed to increase reliability of bulk electric power supply to the region and is one of the national groups which makes up several area councils. These companies exchange information on planning, construction, system loads and other matters affecting the bulk power supply within the area.

All three of these major South Carolina utilities are also purchasing power from small power producers and cogenerators as required by the Federal Energy Regulatory Commission under the Public Utility Regulatory Policies Act of 1978 (PURPA) to meet system loads.

GENERAL RATE CHANGES

The South Carolina electric consumer, after having enjoyed continually decreasing costs from 1931 to 1969, has seen increases in rates beginning in 1970. The increasing cost of money, construction, fuel and other items which go into the expense of providing electric service have dictated the need for the Commission to grant increases to the utilities under its jurisdiction. These increases are designed to insure that the Companies will be able to continue to provide adequate and reliable service while recovering the prudently incurred costs to serve the increasing demand.

Carolina Power & Light Company filed for an increase in February 1987 to cover a portion of the cost of the Harris Nuclear Plant and filed the companion request in March 1988. CP&L's last general rate increase occurred in August 1988.

Duke Power Company's last general rate increase was granted in November 1991 to include costs associated with the new Bad Creek Hydro facility. The Commission approved an overall rate decrease of approximately 8% effective June 1996 pursuant to decreasing buy-back power levels associated with the Catawba Sale Agreement.

South Carolina Electric & Gas Company filed an Application for a two-phase increase to be effective January of 1996 and 1997 to coincide with the commercial operation date and property tax liability of the coal-fired Cope Electric Generating Station, respectively. A determination was made in this matter in January 1996, resulting in a two-part increase totaling approximately 9% effective January 15, 1996 and January 1997, respectively.

INTEGRATED RESOURCE PLANNING (IRP)

Good planning and management have provided South Carolina with adequate and reliable electric power in the past and the organizations which generate and sell electric power in South Carolina continue to provide adequate power at reasonable rates for the present and future needs of the State. In order to assist in the accomplishment of these goals the Commission, in 1987, began general proceedings to establish a framework for Least Cost/Integrated Resource Planning (LCIRP) development. A conference was held in October 1988 and was jointly sponsored by the North Carolina Public Utilities Commission and the South Carolina Public Service Commission with the North Carolina Alternative Energy Corporation as the Coordinating Agency. The purpose of the conference was to explore the areas of LCIRP from which a cohesive plan might be developed independently for each State while sharing the same background and resources.

The Commission issued procedures in 1991 requiring the utilities to file Integrated Resource Plans (IRPs). The Commission has authority to require filing of IRPs by utilities and to require other actions to implement integrated resource planning in South Carolina.

The objective of the IRP process is the development of a plan that results in the minimization of the long run total costs of the utility's overall system and produces the least cost to the consumer, consistent with the availability of an adequate and reliable supply of electricity while maintaining system flexibility and considering environmental impacts. In conjunction with the overall objective, the IRP should contribute toward the outcomes of improved customer service, additional customer options, and improved efficiencies of energy utilization.

Pursuant to the procedures, each utility was required to file a detailed 15 year IRP every three years beginning in 1992. The IRP filing must contain a statement of the utility's long-term and short-term objectives and how these objectives address the overall objective of the IRP process as stated by the Commission. The filing must also indicate how the utility's resource plans seek to ensure that the utility incorporates the lowest cost

options for meeting the consumers' electricity needs consistent with the availability of an adequate and reliable supply of electricity. Some other requirements of the utility's IRP filing include the evaluation of the cost effectiveness of each supply-side and demand-side option, consideration of the environmental costs of the plan, a demand and energy forecast, a discussion of risk assessment associated with the plan, transmission improvements and/or additions necessary to support the plan, evaluation and review of existing demand-side options utilized by the utility as well as discussion of future demand-side and/or supply-side options.

Finally, the IRP procedures require that the Commission review a utility's IRP filing to evaluate the extent of compliance with the Commission's procedures for the specific purpose of determining whether the plan is reasonable at that point in time. The Commission is also to review and determine whether the options selected and incorporated within the IRP are consistent with the Commission's procedures and whether such options have been justified by the utility within its IRP filing. The Commission does not intend to dictate to utility management the specific options that should be adopted as part of the IRP. The utility must maintain responsibility for its performance regarding the implementation of the selected resource options. When the Company seeks to recover its costs, the Commission will determine whether the costs, incurred over time, resulting from implementing each chosen option are reasonable. The Commission may also review the appropriateness of the Company's implementation process for each option. The IRP procedures provide that a utility may file a cost recovery plan with the Commission for approval.

During 1992 and 1995, CP&L, Duke, and SCE&G each filed their respective IRPs with the Commission consistent with the requirements of the Commission's IRP procedures. During 1993 and 1996 respectively, the Commission processed these filings per established procedures.

The Commission also required that each utility file a Short Term Action Plan (STAP) as a separate document in the two intervening years. The STAP is a status report on the implementation of each Company's IRP. CP&L, DUKE, and SCE&G have each filed its STAP for 1993, 1994, 1996 and 1997. Lockhart Power is not required to file a STAP.

RATES

During 1997, the 945,107 residential customers in South Carolina served by the privately-owned electric utilities paid \$937,368,270 for 12,448,032,000 KWH of electricity. The average South Carolina residential customer used 13,171 KWH annually at an average cost of \$991.81 or 7.53 cents per KWH, a 6.24% decrease in usage, a 6.36% decrease in a total bill and a decrease of 0.13% in cost per KWH from 1996. In comparison, the average United States consumer paid 8.94 cents per KWH, a 1.02% increase in cost per KWH from 1996 and 18.73% more per KWH than the average South Carolina residential ratepayer.

There were 164,074 commercial and small power customers of the privately-owned utilities who purchased 10,978,362,000 KWH at an average rate of 6.21 cents per KWH, compared to the national average of 7.83 cents per KWH.

The 3,868 industrial customers of the privately-owned utilities in South Carolina purchased 21,428,715,000 KWH at an average rate of 3.90 cents per KWH, compared to the national average of 4.69 cents per KWH.

Industries now located within South Carolina and those desiring to move into the State will find that electric power can be secured throughout practically the entire State.

TERRITORIAL ASSIGNMENT ACT

The General Assembly passed the "Territorial Assignment Act" in 1969 and the Commission, pursuant to the Act has required all "electric suppliers" to file maps with the Commission showing distribution electric lines in existence as of July 1, 1969. As of July 1, 1971, mylar maps of all counties in South Carolina had been filed with the Commission and negotiations between the "electric suppliers" was begun.

Territory in most of South Carolina has been agreed upon by "electric suppliers", except some areas left unassigned, and Orders approving the assignment of these areas have been issued by the Commission. Service rights and territorial issues continue to be heard and adjudicated by the Commission.

SITING ACT

The 1971 General Assembly passed an Act to give the Commission authority over "UTILITY FACILITY SITING AND ENVIRONMENTAL PROTECTION" effective January 1, 1972.

The three major utilities are now providing for the Commission, on an annual basis, a report containing a minimum ten-year forecast of loads and resources including contemplated construction.

COMPETITION/RESTRUCTURING

The National Energy Policy Act of 1992 encouraged competition in the electric industry. As a result, The Federal Energy Regulatory Commission (FERC) sought to promote competition in wholesale electric markets through the issuance of Order No. 888 on April 24, 1996. This Order requires that all public utilities which own, control or operate facilities used for transmitting electric energy in interstate commerce provide open access to these facilities on a non-discriminatory basis.

Electric restructuring in South Carolina has received considerable attention in recent months. Legislation was filed in the South Carolina General Assembly during the 1997 session addressing restructuring of the existing electric industry into a more competitive market. In order to accomplish this, it will likely require modifications of existing statutes and laws which will change the regulatory process and the manner in which electric utilities currently conduct operations in South Carolina. No South Carolina legislation was finalized during the 1997 or 1998 session pertaining to electric restructuring.

The Public Service Commission of South Carolina continues to study, monitor and gather information from within South Carolina as well as throughout the country, in order to be in a position to provide knowledgeable insight and input on this complex, evolving process. As part of this process, the Commission, in August 1997, held an information gathering proceeding which provided a forum for interested persons and entities to present views on deregulation and restructuring of the electric industry in South Carolina. There were approximately thirty initial filings/inputs as a result of the public notice, followed by a comment period and the proceeding in August.

Most restructuring proposals contemplate customer choice of generation supplier while maintaining the basic status of the transmission and distribution systems as they currently exist. In response to a Legislative request, and resulting from the fact gathering proceeding, the Commission submitted a PROPOSED ELECTRIC RESTRUCTURING IMPLEMENTATION PROCESS report to the South Carolina General Assembly on February 3, 1998. This document provided *only* a Process for implementing electric restructuring but did not address the fundamental question of whether restructuring is in the public interest. This question and several other major policy issues were recommended to be addressed and resolved by the General Assembly before proceeding with restructuring. The Report recognized South Carolina's enviable position in the areas of energy costs and economic development, and urged caution and careful consideration and deliberation as there may be little to gain and much to lose by being at the forefront of a restructuring movement. The Commission's PROPOSED ELECTRIC RESTRUCTURING IMPLEMENTATION PROCESS document may be accessed on the Commission's web page at <http://www.psc.state.sc.us/publications/pubs.htm>.

C. TELECOMMUNICATIONS

The Utilities Department is responsible for the work necessary for the regulation of rates, compliance with tariffs, and quality of service pertaining to twenty-seven (27) Incumbent local telephone companies and four hundred seventy nine (479) companies that are certificated to provide long distance services.

During 1996, Congress and the South Carolina General Assembly passed landmark legislation which has impacted the Commission and its Utilities Department. Congress enacted the 1996 Telecommunications Act. On a state basis, the Governor signed legislation, Act 354, on May 29, 1996. These two legislative changes set the ground work for entry of competitors in the local telephone markets. New carriers, as allowed by law, are beginning to compete with the Incumbent Local Exchange Carriers (ILEC). As of June 30, 1998, the Commission has authorized fifty-eight (58) competitive carriers. These new entrants are called Competitive Local Exchange Carriers (CLECs). The new laws set forth provisions which need to be addressed or accomplished before these carriers may begin their operations. Some of these provisions, which require specific Commission action, have already been reviewed or are currently under review.

To be able to better serve the needs of the customer, who expects better service without delays, equipment failures, or inaccurate billing, the Staff is constantly monitoring the operations of the five hundred and sixteen (516) telecommunications companies under the regulation of the Commission. These inspections and procedural evaluations are in the form of facilities inspections, cable tests, complaint visits, and compliance reviews pertaining to business office and other general operations of the Companies. Fifty-Eight (58) facilities inspections were performed during the year to determine the condition of equipment and the quality of service being rendered. The Staff also performed fourteen (14) compliance reviews to determine the companies' level of adherence with the various tariffs, regulations and guidelines set forth by the Commission. These seventy-two (72) inspections are a vital part of the department's overall function.

The Staff maintains updated files regarding tariffs, Commission Orders, territorial maps, and other pertinent data. The Department was involved in one hundred forty-eight (148) formal hearings involving telecommunications companies. In addition, five-hundred and eighty (580) tariff filings covering new services or changes in language were reviewed by the Staff and approved by the Commission.

The telecommunications companies have continued to make large investments to improve their central offices, outside plant, and toll equipment in an endeavor to cope with their constantly expanding and changing subscriber base and the subscribers' desires for new and innovative telecommunication services. The Staff has strived to stay abreast of the needs of the subscriber and the changing industry by maintaining a close working relationship with the Companies in order to better serve all affected parties.

D. WATER AND WASTEWATER

The majority of water and wastewater utilities operating in the State of South Carolina are owned and operated by municipalities, counties, public water and sewer districts, public water and sewer authorities and Commission of Public Works. These utilities are exempt, by state statute, from jurisdiction of the Public Service Commission. As of June 30, 1998, there were 27 water companies, 24 wastewater companies and 21 combined water and wastewater companies regulated by the Public Service Commission of South Carolina.

There were three (3) new water utilities granted a Certificate of Public Convenience and Necessity during the fiscal year, and seven (7) systems transferred to other utilities or utilities not regulated by this Commission.

More stringent demands by state and federal agencies, higher operating and maintenance costs, wages and supplies, caused three (3) water and wastewater companies, operating in this state, to apply to the Commission for authority to increase their rates and charges for water and wastewater service.

As prescribed by law and after proper advertisement, public hearings were held on each application for adjustments in water and wastewater rates and charges.

Prior to issuing a Certificate of Public Convenience and Necessity to a water and wastewater utility, the Commission, among other items, required a performance bond in accordance with Section §58-5-270 of the 1976 Code of Laws of South Carolina as amended, complete cost and rate data, approval of adequate design, and supply potential, plat of proposed service area and copy of engineering plans and specifications.

VI. RESEARCH DEPARTMENT

The Research Department provides the Commission with specific data and economic and financial analyses necessary for the regulation of firms under the Commission's jurisdiction. The Department presents testimony and exhibits regarding the allowable rate of return on common equity for utilities, the compliance of Integrated Resource Plans with Commission orders and State statutes, the compliance of telecommunications tariffs with Commission orders, and alternative forms of regulation. Also, at various times, the Department provides energy and peak demand forecasts for electric utilities regulated by the Commission. The Department is active in assisting in the development of Commission policy regarding new and emerging issues in a dynamic regulatory environment. These issues include utility diversification, intraLATA toll competition in telecommunications, implementation of an intrastate universal service fund, developing an interim local exchange carrier fund, costing and pricing of services within a more competitive environment, Integrated Resource Planning, cross subsidization, electric industry restructuring, and compliance with State and Federal energy statutes. The Department is specifically involved in electric, natural gas, and telecommunications issues.

To properly carry out these responsibilities, the Department must seek to employ state-of-the-art financial and economic methodologies and techniques. The Department estimates the rate of return of a utility by relying on financial techniques such as the Discounted Cash Flow and the Capital Asset Pricing Model. Forecasts have been developed through the use of Econometric modeling techniques, including multiple regression and input/output models.

The Research Department also reviews proposals by the various regulated utilities pertaining to the issuance of long-term debt, preferred stock, common equity, and other forms of financing. In addition, quarterly reports are developed and provided by the Research Department to the Commission on the cost of equity for the ten major regulated utilities operating in South Carolina. These reports enable the Commission to monitor the impacts of changing economic and financial conditions on the risk and expected return of the utilities. The Department has testified more than eighty times since it was established in 1977. Since its creation, the Research Department has also been involved in administering management audits of certain utilities operating in South Carolina; and, administering various Federal grants from the Department of Energy.

The Research Department reviews trends in costs, revenues, earnings per share, dividends per share, market price, book returns, bond yields, capital structure, market-to-book ratios, dividend yields, and other items as part of its analysis of the business risk, financial risk, and market risk and financial conditions of each major utility regulated by the Commission. The Department also monitors trends in overall economic indicators such as Gross National Product, Standard and Poor's 500 Market Index, interest rates, bond yields, and inflation rates. Regional and State economic conditions are also reviewed to provide a better understanding of the environment in which the regulated utilities operate in South Carolina.

In 1994 the Research Department took on additional responsibilities. The Public Service Commission is now responsible for ESF-12 of the State Emergency Plan with the principal objective of restoring energy as soon as possible during emergencies. Briefly the responsibilities include an assessment of the extent of damage to energy systems, maintenance of energy damage and restoration status reports, coordination of emergency power fuel activities during immediate response operations, and coordination of restoration activities for electricity and fuel supplies to a normal level after an emergency. The Research Department is directing the Agency's emergency preparedness response.

The focus of the Research Department has also changed. While rate of return testimony is still a top priority, the Department is devoting much of its efforts to investigating emerging issues such as telecommunications deregulation, increasing competition in the electric and gas industries, electricity wheeling, and nontraditional methods of regulation. The Department also meets periodically with the Commissioners to discuss the impacts of the issues on the utilities and ratepayers of South Carolina. Continuous and rapid changes in the utility environment will make the advisory function of the Research Department more important as the Commissioners strive to maintain proactive regulation and prevent being forced into reactive regulation. In FY 1997/1998, the Research Department was given responsibility for computer services. Computer services is responsible for ensuring the information needs of the Commission are met, including the operation and maintenance of 64 personal computers, 14 laptop computers, 14 printers, a Digital VAX, and a Digital ALPHA.

In FY 1997/1998 the Research Department testified in one Commission hearings on rate of return and cost of capital for a natural gas pipeline company. The Department also presented testimony on electric industry restructuring before the South Carolina House and Senate committees on Labor, Commerce, and Industry, and made two presentations on electric restructuring to outside organizations. A process for restructuring the electric utility industry was developed and presented to the South Carolina legislature. Estimates of stranded costs were also developed. The Department also prepared two editorials on nuclear waste that were distributed to twenty newspapers, prepared eight reports on the impact of alternative regulation on telecommunications companies, analyzed and presented five utility financing proposals and two real estate transactions to the Commission, prepared a resolution on nuclear waste for the South Carolina legislature, prepared a report on Nuclear waste Fund payments for Sen. Hollings, prepared eighty-five letters on nuclear waste issues and mailed them to federal legislators and agency heads, and participated in over one hundred twenty NARUC teleconferences. Research Department employees also participated in five training exercises directed by the Emergency preparedness

Office and worked at the state operations center during two hurricanes." Each month the Department prepares a report briefly describing current regulatory issues which is distributed to the Commissioners and staff. The Research Department also assisted the State Energy Office in analyzing utility integrated resource plans and the preparation of a report on Demand Side Management.

VII. TRANSPORTATION DEPARTMENT

The functions of this Department are to enforce the Code of Laws of South Carolina, 1976, to include Chapter 23, Articles 1 through 17 as amended in the 1995 Cumulative Supplement (Volume 19) in conjunction with the South Carolina Public Service Commission Transportation Division Rules and Regulations Pertaining To Motor Carriers (1995). The Transportation Division is responsible for the safe, effective form of regulation with regard to motor carriers of passengers, household goods and hazardous waste for disposal while focusing on the interests of the citizens, the employees and the motor carriers of South Carolina.

Effective January 1, 1995 the Federal Aviation Administration Authorization Act of 1994 pre-empted state regulation of the rates, routes and services of intrastate motor carriers of property other than household goods transporters and hazardous waste transporters. The Federal Aviation Administration Authorization Act of 1994 did not affect the intrastate regulation of passenger service. As a result of this pre-emption and due to further re-structuring within The Department of Public Safety, The Public Service Commission of South Carolina now issues Certificates of Public Convenience and Necessity and Certificates of Fit, Willing and Able based on the carrier filing an acceptable safety rating, proper rates where applicable and appropriate insurance forms.

The Transportation Department consists of the following three Sections:

- A. Licensing/Certificate Section
- B. Rates Section
- C. Law Enforcement Section

A. LICENSING SECTION

The Licensing Section of the Transportation Department consists of the following three sections:

Certificate Section
Insurance Section
License Decal Section

1. CERTIFICATE SECTION

The responsibilities of the Certificate Section are to process all applications, to acquire new, to amend existing, to transfer, to suspend, or to cancel Certificates of Public Convenience and Necessity for the transportation of persons or property.

There are presently 621 intrastate and 17 interstate only motor carriers holding Certificates of Public Convenience and Necessity granted by the Commission, as follows:

CLASS	INTRASTATE CARRIERS	INTERSTATE CARRIERS	TYPE OF CARRIER
A	9	0	Common carrier transporting passengers over regular routes and on regular schedules.
B	1	0	Common carrier transporting passengers not over regular routes or on regular schedules.
C	469	17	Common carrier - taxicabs and charter buses - not operating over regular routes or on regular schedules.
E	121	0	Common carrier transporting property over irregular routes and on irregular schedules.
F	5	0	Contract carrier transporting Property over irregular routes

Notices of Filing, which must be published in newspapers of general coverage in the affected service areas, are prepared on Applications for Class A, Class C-Charter, Class E and Class F, for new authority and to transfer or amend existing authority. Notices of Filing were prepared on 37 Applications during this fiscal year and 27 public hearings were held, as indicated below:

HEARINGS HELD DURING 1997-1998 FISCAL YEAR

MATTERS HEARD	NO. OF HEARINGS	APPROVED	DENIED
Class A New Certificate	0	0	0
Class E New Certificate	18	17	1
Amended	4	4	0
All Classes Petition for Rule to Show Cause	4	4	0
Compliance with Rules & Regulations	1	0	0
FISCAL YEAR TOTALS	27	25	1

Applications for Class A (Restricted) and Class C (Taxicab) Certificates do not usually require Notices of Filing or Hearings. It is usual procedure for each of these Applications, after going through the acceptance process, to be presented to the Commission for a decision.

The Certificate Section processed and issued 260 Orders during the fiscal year. The Orders involved the issuance of Certificates of Public Convenience and Necessity, which are only issued after the motor carrier has filed all applicable insurance, rates, license decal fees and achieved a satisfactory safety rating.

There were 221 Certificates of Public Convenience and Necessity processed during the fiscal year, as outlined below:

CERTIFICATES PROCESSED DURING
FISCAL YEAR 1997-1998

ALL CLASSES	YEAR TOTALS
NEW	118
AMENDED	35
TRANSFERRED	2
CANCELLED	58
SUSPENDED	6
REINSTATED	2
TOTAL CERTIFICATES PROCESSED	221

2. INSURANCE SECTION

The function of the Insurance Section is to maintain the insurance filings made by for-hire intrastate motor carriers and interstate motor carriers who base equipment in South Carolina. There are approximately 621 motor carriers who are required to file evidence of bodily injury and property damage liability insurance. Of these carriers, approximately 118 are required to file evidence of cargo insurance.

The Insurance Section maintains a suspense file for approximately 60 days on insurance filings for which an application is not pending. Upon receipt of an application, the filing is accepted.

The Insurance Section notifies regulated carriers of an impending thirty (30) day notice of cancellation of insurance and if no other coverage has been filed within that time limit, the motor carrier must cease operations on the date stated in such letter.

Prior to the issuance of a Certificate of Public Convenience and Necessity and the rendition of motor carrier service authorized therein, evidence of the required insurance must be on file with the Commission. Once licensed, motor carriers must keep insurance on file continuously. Motor carriers who fail to keep insurance on file are subject to having their Certificates revoked and canceled by the Commission.

3. LICENSE DECAL SECTION

Motor Carriers operating within the State of South Carolina on an intrastate basis and carriers based in South Carolina operating on an interstate basis are required to purchase license decals based on vehicle carrying capacity or empty weight, ranging in price from \$7.50 to \$50.00 semi-annually. These license decals are evidence of the motor carrier's compliance with the Motor Vehicle Carrier Law.

PUBLIC SERVICE COMMISSION LICENSE DECALS ISSUED BY CLASS:

CLASS A LICENSE.....	43
CLASS B LICENSE.....	0
CLASS C LICENSE.....	2,454
TOTAL LICENSE DECALS ISSUED.....	2,497

TOTAL LICENSE DECAL FEES (NET)..... \$114,980.05

B. RATES SECTION

Effective January 1, 1995 The Federal Aviation Administration Authorization Act of 1994 pre-empted state regulation of rates, routes and services of intrastate motor carriers of property other than household goods transporters and hazardous waste transporters.

The Transportation Department has one Public Utilities Accountant III on staff. One of the primary duties of this person is to perform on site compliance audits and desk audits. These audits offer support for pending rate cases as well as enforcement investigations. For the fiscal year 1997-98 there were 75 complaint and/or compliance audits performed.

As a result of Deregulation of general commodities transporters and with the abolishment of the South Carolina Motor Truck Rate Bureau, the South Carolina Tariff Bureau Inc. was formed in March of 1995 as a statewide bureau offering joint and local rates applying on household goods. The Commission also recognizes individual tariffs. During the fiscal year 1997-98 The Transportation Department handled 34 applications to file or amend rates with the Commission.

C. LAW ENFORCEMENT SECTION

The enforcement of the Motor Vehicle Carrier Laws of the State, Sections 58-23-10 through 58-23-1830 of The South Carolina Code of Laws, 1976, as amended in the 1997 Cumulative Supplement(Volume 19) is carried out by the staff of eight inspectors stationed throughout the state. Tools used in enforcement include random vehicle inspections, investigations and inspections stemming from complaints and audits performed in the field. During fiscal year 1997-98 these inspectors in conjunction with staff investigations made a total of 86 arrests totaling \$17,530 in fines.

All of the inspectors are commissioned by the South Carolina Law Enforcement Division and are entitled Law Enforcement Officers II. All officers wear uniforms and patrol in marked cars with two-way radios and cellular phone communication with the Commission and each other. Their duties and responsibilities are to insure that the motor carriers under the jurisdiction of the Public Service Commission of South Carolina comply with the South Carolina Motor Vehicle Carrier Law and the Commission 's Rules and Regulations Pertaining To Motor Carriers. The inspectors

investigate violations, issue warrants of arrests, initiate legal proceedings for violations and work with the regulated carriers and with the public helping them to comply with the laws.

INSPECTIONS: For fiscal year 1997-98 the eight inspectors performed 4,253 inspections. Some inspections were random roadside while others were complaint generated.

PUBLIC RELATIONS WORK: Inspectors recorded 256 assists to regulated carriers and the general public with regard to various motor carrier issues.

COMPLAINT RESPONSES: During the period inspectors, along with staff, answered and investigated 118 complaints.

COURT DUTY: Inspectors and/or staff attended or visited various magistrates and central traffic courts 56 times during the fiscal year 1997-98. Some of these visits were scheduled court appearances while other visits were made to gather necessary information to make cases.

CITATIONS: Inspectors issued or took out 86 citations/warrants for the reporting period totaling \$17,530.

WARNINGS: Inspectors issued 34 warnings during the reporting period. Most warnings were issued to passenger carriers for decal violations.

EDUCATION: During the fiscal year 1997-98 inspectors and staff attended 127 2 education sessions. The majority of these sessions were for officer re-certification such as firearm and driver training. The officers are also required to receive legal and core course updates each year.

INVESTIGATIONS: Inspectors and staff reported 58 different investigation activities. These investigations were performed to support various cases made against carriers during the reporting period.

COMPARATIVE ARREST REPORT

Fiscal Year	Arrests	Fines
1992-93	1,190	\$ 94,475.00
1993-94	1,960	\$194,975.25
1994-95	1,035	\$106,836.25
1995-96	23	\$ 19,425.00
1996-97	80	\$ 59,800.00
1997-98	86	\$ 17,530.00

SAFETY DEPARTMENT

The Commission has established a Safety Department dedicated to promote public safety by ensuring the safety of the State's railroad system and the gas and liquid pipelines in our State.

Gas Pipeline Safety

In accordance with the South Carolina Gas Pipeline Safety Act of 1970 the Commission was given the authority to carry out and enforce safety regulations pertaining to gas pipelines. The Commission is certified with the Federal Office of Pipeline Safety (OPS) to carry out and enforce the provisions of the Federal Regulations For the Transportation of Gas By Pipeline. The Commission also recently signed an Agreement with the OPS whereby the Commission will serve as an agent of OPS and carry out safety inspection activities on intrastate liquid pipelines. At the end of calendar year 1997, the Commission's gas safety jurisdiction covered 2,293 miles of high pressure transmission pipeline, 75 miles of liquid pipelines, 14,388 miles of distribution main line, 541,799 service lines, and four (4) liquefied natural gas plants. The operators of these facilities include privately-owned utilities, municipalities, public works commissions, gas authorities, liquefied petroleum distributors, an interstate pipeline, US government, and land fill gas projects. During calendar year 1997, gas safety investigators spent 412 days inspecting gas facilities to ensure the operators' compliance with the regulations and to assist the operators in complying with the regulations. One reportable gas related accident occurred during the year.

Railroad Safety

The Commission's Railroad Safety Program was as certified by the Federal Railroad Administration in 1980 pursuant to the Federal Railroad Safety Act of 1970. For the period, July 1997 through June 1998, inspectors spent 203 days making inspections of railroad equipment and facilities. Inspectors made inspections of 9,520 rail cars, 12 locomotive inspections, 4,462 record inspections, observed 85 train air brake tests and single car tests, and performed 169 blue signal inspections. Track inspections totaled 14 miles, of which 0 miles were visually inspected on foot. The number of track inspections was unusually low because the Commission's only track inspector position became vacant during the period covered in this report.

Inspections of accidents and derailments were also conducted to determine probable causes and investigations were made in response to complaints from the general public.

**GAS OPERATIONS IN SOUTH CAROLINA UNDER SAFETY JURISDICTION
JUNE 30, 1998**

NAME OF UTILITY	MANAGING OFFICER	ADDRESS
